The Air Pollution Control Program (APCP) strives to maintain and improve the quality of Missouri's air to protect public health, general welfare and the environment. The APCP operates according to the Clean Air Act, Missouri Conservation Law and State Implementation Plans and Rules. The APCP issues construction and operating permits to help ensure facilities are built in compliance with the laws and rules and that they will not operate in a manner to cause violations of federal and state, health-based air quality standards.

Through grants the department encourages waste reduction, reuse, recycling, energy recovery and efficient processing of Missouri's solid wastes by providing grants to the state's twenty solid waste management districts for administration and funding projects in their area. Local governments, schools, small and large businesses, sheltered workshops and individuals seek and receive grants to support activities to remove materials from the waste stream and return the materials for beneficial reuse or energy recovery. This core also supports the removal of illegally dumped scrap tires.

A financial assurance instrument (FAI) provides collateral to the state by landfill and scrap tire site owner/operators to properly implement closure and/or post-closure activities in the event the owner and/or operator fail to do so or are no longer capable of doing so. This appropriation allows financial assurance on activities required to ensure closed landfills have adequate funding and controls in place, including: maintenance or replacement of the landfill cover, an adequate soil/vegetative cap to prevent water infiltration, methane gas monitoring to protect public safety, monitoring for potential groundwater and surface water impacts, and grounds keeping.

**Section 6.225**

Budget Book Page 203

Core funding provides field support and monitoring functions throughout the state. These activities play a critical role in the overall delivery of services in our various environmental programs (air, drinking water, solid waste, and hazardous waste). In addition, the program provides environmental emergency response, sampling and sample analysis, cleanup of controlled substances (primarily wastes associated with methamphetamine production), and managing the Clandestine Drug Lab Collection Station Program.

**Current Flexibility:** 25% between GR programs and regional offices and between PS and E&E and 75% between funds for Federal and other funds

**Legal Basis:** Federal Clean Water Act; Federal Safe Drinking Water Act; Federal Clean Air Act; Federal Comprehensive Environmental Response Compensation and Liability Act; Federal Superfund Amendments and Reauthorization Act; Federal Resource Conservation and Recovery Act; Federal Solid Waste Disposal Act; Oil Pollution Act of 1990; Chapter 260 §500-552 RSMo, Chapter 260 §818-819 RSMo, Chapter 640 §040

**Funding Sources:** General Revenue  
Federal – Department of Natural Resources Federal (0140)  
Other – Environmental Radiation Monitoring (0656), Hazardous Waste (0676), Natural Resources Protection - Air Pollution Permit Fee Subaccount (0594),  
Natural Resources Protection - Water Pollution Permit Fee Subaccount (0568), Natural Resources Protection (0555), Safe Drinking Water (0679),  
Solid Waste Management (0570)

**CORE ADJUSTMENTS:**

**GOVERNOR CHANGES**

Language – Omits following FY 16 language as it relates to non-GR appropriations, "...and no flexibility is allowed between personal service and expense and equipment"

**DRAFT HCS CHANGES**

Language – Restores the FY 16 language, then drops flex to 25% for non-GR appropriations

**Petroleum Storage Tank Insurance Fund – Petroleum Related Activities**  
**Section 6.230**

Budget Book Page 149

This section allows the department to regulate over approximately 3,500 underground storage tank facilities to reduce incidents of releases and to ensure the detection of releases that do occur. This appropriation allows funds to be available if a tank owner has a leak or spill. The department oversees the reporting, inspection, investigation, closure and cleanup of releases from the storage tanks.

**Section 6.260**

Budget Book Page 263

In FY 2014, with the transfer of the Land Survey Program to the Department of Agriculture, the Division of Geology and Land Survey became the Missouri Geological Survey (MGS). Headquartered in Rolla, MO, MGS investigates the state's geology and provides geologic and hydrologic information and expertise to assist with economic and environmental decisions relating to economic development, site remediation, containment migration, subsurface investigations and geologic hazards. The division also determines the character and availability of the state's energy and mineral resources. The MGS implements the Water Well Drillers' Act by establishing standards for domestic water wells, monitoring wells and geothermal ground source heat pump wells.

This section provides for the expenditures of forfeited surety bonds for improperly abandoned oil and gas wells. If a producer fails to properly close the wells at the conclusion of operations, the State has the ability to claim the bond and use the funds to properly plug the wells. Revenues of the fund are also used to handle emergency situations as they arise, such as a leaking gas well.

The Land Reclamation Program oversees the reclamation of abandoned mine sites in Missouri. This includes sites abandoned prior to 1977 and sites where permits were revoked and reclamation bonds were collected. For coal sites abandoned prior to 1977, the program has access to federal funds to directly contract for the reclamation activities at these sites. Where bonds have been forfeited on permit-revoked mine sites, this appropriation gives the authority for reclamation of these bond forfeited sites to restore mined lands to productive uses such as agriculture, wildlife or development.

The Water Resources Center provides information for Missouri's comprehensive water needs by examining both surface and groundwater use and availability. The Water Resources Center administers the provisions of the Missouri Dam and Reservoir Safety Law; regulating all nonfederal, nonagricultural dams 35 feet and higher through inspections, registration and issuance of construction permits. Water Resources Center staff investigates water supply issues; maintains and updates the Missouri's Public Water Supply database for groundwater wells; collects, analyzes and distributes groundwater-level data from a statewide network of observation wells; and, evaluates the public water supply wells and provides casing and total depth specifications. The Water Resources Center continues statewide water planning efforts and conducts studies to estimate current water usage, inventories existing water resources, identifies future sources and their sustainability, determines future statewide demand and population growth and works with partners to develop recommendations to meet statewide water needs.

Section 6.270**

Budget Book Page 330

The U.S. Army Corps of Engineers and the state of Missouri entered into a contract in 1988, obligating the state to repay the Corps of Engineers for building a 20,000 acre-feet water supply storage into the Clarence Cannon Dam and Mark Twain Lake project. The payment is limited to 3.22% interest and a portion of the overall project's operation and maintenance expenses. The state is billed in the spring of each year for interest and operations and maintenance expenses for the previous federal fiscal year ended. The Clarence Cannon Wholesale Water Commission markets and develops water from the Mark Twain Lake, and has been conveyed additional water storage rights.

This funding will develop the "backbone" of an integrated data system to manage and share core environmental and regulatory data. An integrated system is based on the concept that certain activities are common across the department. This "core" functionality serves to link similar information on the same facility across multiple organizational units. Branching off this core is program-specific functionality that supports requirements unique to different regulatory programs. Some of this branching functionality already exists in stable systems that use modern technology. In those cases, interfaces can be built to link well-performing systems to the core. In other cases, databases are severely lacking in functionality or are non-existent

Budget Book Page 463

In the Missouri State Parks, sales tax is collected on souvenirs, camping fees, wood sales, gift shop sales, cave tours, historic site tours, ATV usage permits, ATV accessories, vending machine sales, swimming pool fees, pay phone receipts, rentals of shelter houses and rentals of cabins and other guest quarters. In addition, the Missouri Geological Survey collects sales tax on maps and publications sold to the general public. This appropriation allows the department to promptly and efficiently transfer state tax revenue to the General Revenue Fund.

This section provides for the transfer from various DNR Other Funds to the Cost Allocation Fund. This cost share proposal uses the department's federal indirect cost rate as a method of allocating administrative costs to dedicated funding sources within the department. Each dedicated fund's share is computed based upon its proportionate percentage of personal services, fringe and expense and equipment appropriations.
